Training, Tools, and Accessories for FK Series

sset.swagelok.com

Complete your assembly capabilities with training, tools and accessories, no matter the connection type integrated within your system.

TOOLS AND ACCESSORIES

Preswaging Tool Available in 1/4", 1/2 "

For Swagelok tube fitting installations in close quarters, the Swagelok preswaging tool is a convenient accessory.

Gap Inspection Gauge Available in 1/4", 3/8", 1/2"

Insures the fitting has been correctly pulled up on initial installation, whether using a torque wrench, standard wrench tightening, or preswaging with the MHSU.

Depth Marking Tool Available in 1/4", 3/8", 1/2"

Helps ensure that tubing is bottomed on the shoulder inside the Swagelok tube fitting body.

Multihead Hydraulic Swaging Unit (MHSU)

Includes a tube marking feature to indicate when tube is properly bottomed.

TRAINING

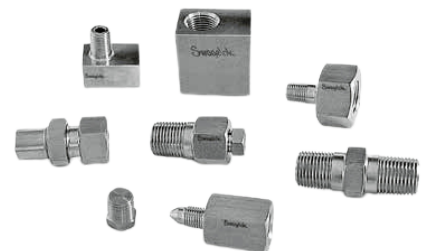

Medium- and High-Pressure Installation Training

Consistent performance, especially in critical applications, is important to a successful system. This course offers foundational knowledge in installation tailored to bring optimal performance to your medium- or high-pressure system.

Swagelok® Medium- and High-Pressure Cone and Thread Products up to 60,000 psig- IPT Series

Medium- and high-pressure cone and thread products provide a maximum working pressure of up to 60,000 psig. Custom lengths and pre-coned and threaded tube nipples are also available. Contact your Technical Advisor for available configurations and sizes.
